Professional Summary

Data Analyst skilled in SQL (PostgreSQL), Python, Power BI, Advanced Excel, and basic Machine Learning, with hands-on experience analyzing datasets of up to **197K+ records** and delivering actionable insights through data cleaning, statistical analysis, EDA, KPI analysis, and dashboard development.

Education

Mizoram University

Bachelor of Technology in Electronics and Communication Engineering

Aug 2021 – Jun 2025

Aizawl, Mizoram

Experience

Swiggy Sales Analysis (Project-Based) 🔄

Nov 2025 – Dec 2025

SQL (PostgreSQL), Power BI

- Analyzed **197K+ food delivery orders** in PostgreSQL to assess sales performance and customer spending patterns.
- Processed and validated raw Swiggy sales data across **15+ columns** by handling null values and duplicates, then designed a **Star Schema** model for efficient reporting.
- Developed **15+ SQL queries** using joins and window functions to calculate KPIs such as Total Revenue, Total Orders, AOV, and Average Rating.
- Built a **Power BI reporting dashboard** with **10+ visuals**, slicers, and drill-downs to analyze performance across cities, restaurants, dishes, and categories.

Projects

Customer Behavior & Purchase Trend Analysis 🔄

November 2025

Python, SQL, Power BI

- Examined **3,900+ customer transactions** using Python (Pandas) to uncover spending patterns, purchase behavior, and customer segments.
- Cleaned and engineered data by handling missing values and creating metrics like purchase frequency and average spend.
- Executed **15+ SQL queries** to identify revenue drivers across demographics, subscriptions, discounts, shipping types, and product ratings.
- Created an **interactive Power BI dashboard** to visualize customer segments and key revenue trends, supporting data-driven decisions.

Sales Performance & Profitability Dashboard 🔄

December 2025

Advanced Excel, Power Query

- Evaluated **9,000+ retail sales transactions** to study sales results, profit trends, and regional patterns.
- Transformed raw data using **Power Query** by removing duplicates, standardizing text fields, and normalizing date formats across **21+ columns**.
- Created derived columns and developed key **business KPIs** (Total Revenue, Total Profit, Total Orders) using Pivot Tables and Excel formulas.
- Designed an **interactive Excel dashboard** with Pivot Charts, slicers, and KPI cards to deliver actionable sales and profitability insights.

Technical Skills

Programming: Python (Pandas, NumPy, Seaborn, Matplotlib, Scikit-learn), C/C++

Machine Learning: Supervised Learning, Regression, Classification

Databases: SQL (PostgreSQL, MySQL)

Business Intelligence & Tools: Power BI (DAX, Power Query), Advanced Excel (Pivot Tables, XLOOKUP, Dashboards)

Analytics: Statistical Analysis, Data Cleaning, Data Validation, Exploratory Data Analysis (EDA)

Data Modeling: Star Schema | Dimensional Modeling

Business Analytics: KPI Development | Business Analysis
